I am a full stack developer that loves what I do. A self motivated individual with a desire to keep growing. I'm a fast learner that can work under high pressure and bring satisfactory results.

## PROJECTS

### UI Wars

- A website where developers of all skill levels can come to practice their UI skills and compare them to other developers.
- Users can accept or create a challenge. Accepted challenges will display on their dashboard.
- Utilization of Chart.js for real time data display of how many users completed the specific challenge and which tools were used.
- Tools used: React, Redux, Node.js, Express.js, PostgreSQL, Firebase, CSS, SASS, Material-UI, Chart.js

### instaPlan

- An ambitious group effort to make finding current events near you simple and easy.
- Determines a user's location, and using the Google Map API and Eventbrite API, will display events near the user as well events just for that day.
- Users can also create an event that will be shown to other users in the area.
- Tools used: React, Amazon S3, Redux, Node.js, Express.js, CSS, SASS, Reactstrap, PostgreSQL
